The World of Tokenization and the Role it Can Play in Sustainability

12ccw54994K9096

 (\bullet)

The third-panel discussion of the Hubbis Digital Assets Forum in December 2023 in Singapore saw an impressive collection of experts focus their minds on the evolution of tokenisation and extrapolate to how it can be harnessed to enhance sustainability and analyse how private clients can participate in this movement through tokenised investments.

THE PANEL TACKLED SOME OF THESE AND OTHER QUESTIONS:

- >> What is tokenization and is the hype over its potential justified?
- >> What types of assets are being tokenized and how does it relate to the sustainability space?
- In what ways does tokenization democratize access to traditionally illiquid or high-entry-barrier assets? Is there really institutional demand and liquidity, and what is the growth trajectory?
- > How can we address the environmental concerns associated with blockchain technology and digital asset tokenisation?
- >> How is tokenization redefining private wealth and asset management, especially in the context of Asia's evolving financial landscape?
- >> What relevance does tokenization have for UHNW and HNW clients?
- Are they more likely to invest in tokenised assets aligned with ESG (Environmental, Social, Governance) goals?

Chair:

>> Wong Kok Hoe

Marketing and Business Development Director (APAC) Chintai
