ACCREDITATION

Hubbis is an IBF accredited training provider.

We have accredited **IBF-STS** and **FA-CPD** training available.

The accredited training can be purchased as individual programmes.

The Hubbis Digital Learning Platform

FOR OVER A DECADE - HUBBIS HAS ESTABLISHED ITSELF AS THE LEADING PROVIDER OF ONLINE LEARNING THAT IS SOLELY DEDICATED TO THE ASIAN WEALTH MANAGEMENT INDUSTRY.

Over 150 leading private banks and wealth managers use our platform. It enables you to meet your compliance, CPD/CPT, reporting and general learning and development requirements - in a transparent, robust and cost-effective way.

The top reasons your peers use our platform are:

- » Saves you money - usually 80 percent plus of what you currently spend on less meaningful CPD/CPT.
- » Enables you to meet your compliance and regulatory obligations.
- » Our online platform is a purpose-built, stand-alone solution. It also provides the opportunity for organisations to track and assess their staff, and then custom-make reporting for regulatory and internal / external audit purposes.
- » Training is interactive, meaningful and assessed. Not a pointless box ticking exercise.
- » Training is practical and created by actual wealth management practitioners and experienced professionals.
- » Training material is refreshed and improved regularly - based on feedback.
- » When the regulator audits your CPD/CPT - you have appropriate, structured, documented training reports on a professional platform to show them.
- » You can visibly be seen to invest in training and development of your front-line staff in a proper and robust way.
- » Access to all Hubbis online learning courses with assessments. Over 200 hours in total.
- » Ability to upload ALL internal and external training records to the platform to track total CPD/CPT hours.
- » If you have your own LMS, we can provide you with our existing training courses to expand your Asia-specific learning library.

Creating Bespoke Digital Learning for you

IT'S OUR CORE COMPETENCY TO CREATE CONTENT AND LEARNING SOLUTIONS.

We can either take your existing content/training and create a digital learning experience. Or curate content for you from scratch. This will help you enhance your brand and create tangible connectivity with relevant clients and prospects.

Digital learning could include

- » Any technology requirements - building online training courses, LMS, assessment and reporting.
- » Bespoke online-learning - we create specific training tailored for you.
- » All training material delivered to you is 'white-labelled' - in online format. Based on your requirements.
- » We can build all the online assessment questions for CPD/CPT.
- » The e-learning platform can provide a number of comprehensive reporting tools.
- » For example, in Singapore we have implemented the Hubbis CPD reporting, designed specifically to meet the specifications of the Institute of Banking and Finance (IBF).
- » Each lesson can end with a test - to ensure that the student understands the learning objectives - this can be done online.
- » We can design a programme - and there could be a constant assessment in addition to a final exam.
- » We can build a LMS (Learning Management System) for you.
- » Modules are provided in a SCORM - compliant format.
